

Potable Water Pump

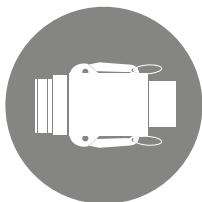

P/N: WS715901B, NSN: 4320-01-440-4421

The FDI Potable Water Pump is designed for use in military field hospitals, but is useful in various settings where water circulation is required. The design makes it easy to install, use, and maintain for rapid and sustained deployment.

The pump pulls potable water from a main collection unit (such as a collapsible bladder) and circulates it through a network of hoses to various points of need, providing pressurized water throughout your facility.

FAST

1.5 inch cam and groove hose fittings for fast and secure connections

SAFE

Start/stop switch for safe connection and operation

PORTABLE

Light-weight, all-welded aluminum alloy powder-coated frame

EASY

Includes Mil-Spec Class L connecting plug
